November

Over 400 species of water and wetland plants found across Alberta, Saskatchewan, and Manitoba are included in this handy

field guide designed for use by both amateur and professional botanists. *Water and Wetland Plants of the Prairie Provinces* features:

- over 300 colour photographs
- over 300 line drawings
- scientific names, including synonyms and origins
- common names
- detailed plant descriptions
- habitats and distributions
- special features, including traditional uses as food or medicine, and unique or harmful characteristics
- comparisons to and descriptions of related species

Since many of the northern wetland plants are circumpolar in distribution, *Water and Wetland Plants of the Prairie Provinces* will also be useful in other parts of Canada, the United States, and Eurasia.
