Prairie's Got the Goods Week!

Biography:

Cory grew up in Nova Scotia's Annapolis Valley, one of the region's main agricultural areas. Cory completed undergraduate and MSc degrees at Acadia University in Wolfville, Nova Scotia, studying botany and entomology which ultimately became pollination biology. He then completed a PhD at the University of Guelph, Guelph, Ontario, then post-doctoral and research associate positions at York University in Toronto. Cory came to Saskatchewan in 2012 and he has worked in Regina at the Royal Saskatchewan Museum as Curator of Invertebrate Zoology ever since, with adjunct professor status with the University of Regina, and has a wonderful family here. Cory's main research interests are bee taxonomy, diversity and conservation, and their roles as pollinators of native and crop plants.
