Native Prairie Speaker Series Webinar

Management of annual brome invasion within northern mixed grassland using indaziflam

Thursday May 23rd, 2024 at 12:00pm MT

**Speaker: Anabel Dombro, Range and Conservation Stewardship Policy Analyst,
Government of Alberta**

Register Free: <https://shorturl.at/oCZ34>

This presentation is FREE! Tune in from anywhere! Everyone welcome!

Native Prairie Speaker Series *Webinar*

Speaker: Anabel Dombro, Range and Conservation Stewardship Policy Analyst, Government of Alberta

About this Webinar:

Annual brome grasses are some of the most widespread and problematic weeds in North America and present a challenge in managing rangeland, with control options needed. The herbicide indaziflam has shown promise in long-term annual brome reduction on western U.S. rangeland, though how these results apply to northern temperate grasslands of western Canada remains uncertain. We monitored the effects of indaziflam for 4 years following treatment in the dry mixed grassland of Southern Alberta.

About the Speaker:

This research was completed during my Masters in Rangeland and Wildlife at the University of Alberta which I recently defended in January 2023. I am now working as policy analyst for the range and conservation stewardship unit with the provincial government.

PCAP's Native Prairie Speaker Series is a monthly webinar about prairie conservation or species at risk.

Hosted by: Caitlin Mroz-Sailer, Stewardship Coordinator, Saskatchewan Prairie Conservation Action Plan
