

Native Prairie Speaker Series

Title: Saskatchewan Species at Risk Farm Program: Northern Leopard Frogs, Loggerhead Shrikes, Sprague's pipits, Baird's Sparrows and Chestnut Collared longspurs

Speaker: Heather Peat Hamm, Simply Ag Solutions Inc

Summary:

Species are at risk increasingly because of habitat loss and human activity. Agricultural is uniquely positioned to support species at risk. Need of species at risk will be presented and ways of incorporating stewardship into day to day management decisions will be discussed.

About Heather:

Heather Peat Hamm has worked on species at risk and interactions with agriculture since 2004 and brings considerable thought to bear on the matter. As a botanist and ecologist from a farm background, Heather delves into how to make stewardship choices while improving the climate change durability of agricultural land. Presently, Heather is the Species at Risk Project Coordinator for Simply Agriculture Solutions.
