Event Description

**An updated event program can be found: <https://www.pcap-sk.org/upcoming-events/native-prairie-restorationreclamation-workshop-2020>*

Plenary Speakers: Leading experts in the field of restoration and reclamation will share success stories and lessons learned about innovative projects. Speakers will represent industry leaders, landowners, academia, environmental organizations and more. For this year, the focus will be about planning and partnerships and Transboundary issues.

Tradeshow: With the goal of networking and developing sustainable partnerships, native seed producers and users, environmental consulting companies, watershed groups and native plant organizations will have booths and displays available.

Poster Session: Innovative research projects about invasive species, endangered species, restoration and reclamation case studies, and native seed research will be on display and presenters available for questions and answer periods. Posters featuring success stories and lessons learned in transboundary grasslands partnership jurisdictions will be encouraged.

Case Studies: An interactive and hands-on exercise about relevant prairie restoration projects will bring perspectives together from all workshop participants. This year, it will include a “speed dating” style case study where participants work in smaller groups to solve a wide diversity of small-scale restoration/reclamation projects.

Networking: Extended coffee breaks and a designated networking time allows for everyone involved in prairie restoration to share experiences, lessons learned and new ideas.

Banquet: An evening event to celebrate the success and hard work of native prairie restoration and reclamation will occur. This will allow for more networking and time at the poster session and tradeshow. A silent auction fundraiser to raise money for youth environmental programs will also take place. The evening will conclude with an award ceremony to celebrate native prairie restoration/reclamation practitioners.

How this event will impact the community

The native prairie ecosystem is home to many species at risk, including both flora and fauna. As these species populations continue to decline and native lands continue to be altered, native prairie restoration and reclamation efforts are more important than ever. This event will bring together stakeholders, land owners and land managers, environmental advocates and students from across North America to share ideas and experiences. This engaging forum will provide insight into the opportunities and challenges that lie ahead for land use, prairie reclamation and species restoration across the Great Plains of North America. New this year, the workshop will be bridged with the annual Transboundary Grasslands Partnership Workshop. This will facilitate greater knowledge transfer between jurisdictions about broader species populations, success stories and lessons learned.

This event will impact local communities, as workshop participants will leave with new ideas and information on how to more efficiently plan for restoration/reclamation projects and leverage partnerships. Community leaders, native prairie advocates and land managers will be able to better address issues such as reclaiming lands, restoring species at risk populations, invasive species, and more. Indirectly, this conference will leave the environment a better place for generations to come.

Event Background and History

The first Native Prairie Restoration and Reclamation Workshop was held in 2011, after participants from the 2010 Prairie Conservation and Endangered Species Conference indicated there was a need for more information specific to native prairie restoration and reclamation. The Native Prairie Restoration and Reclamation Workshop takes place two of every three years (skipping the third year for the triennial Prairie Conservation and Endangered Species Conference). The workshop rotates between Regina, SK and Saskatoon, SK.

Past events:

- 2011 - Regina, SK
- 2012 - Saskatoon, SK: Bridging the Gap
- 2014 - Regina, SK: Stretching Our Boundaries
- 2015 - Saskatoon, SK: The Building Blocks of Restoration
- 2017 – Regina, SK: Reclaiming Spaces, Restoring Species
- 2018 – Saskatoon, SK: Look to the Future, Learn from the Past.

2020 - Regina, SK – The Big Picture: Planning and Partnerships

The overarching theme of the 2020 Native Prairie Restoration and Reclamation Workshop will be "The Big Picture: Planning and Partnerships". Within this theme, issues in the following areas will be addressed:

- Tools to Restore/Reclaim Native Prairie
- Prescribed Fire as a Management Option
- Integrated Pest Management Plan
- Invasive Species
- Planning for a Species Reintroduction
- Planning: Minimizing Impact to Native Prairie – from and Industry Perspective
- Urban Restoration Projects
- Soils and Mycorrhizae
- Ecosystem Management
- Long-term Restoration planning and case studies
- Reclamation/Restoration of Riparian Areas
- Restoration of Aquatic, Plant and Wildlife Species at Risk
- Collaborative Efforts for Species at Risk
- Transboundary Issues: species at risk populations, migratory species, invasive species

The primary objective of this workshop is to hear from all stakeholders involved in native prairie land use:

- First Nations Groups
- Government (federal, provincial, municipal)
- Ranchers and land owners
- Education and Researchers
- Environmental not for profit organizations
- Industry and Utilities
- Watershed Groups

The aim of this workshop is to bring all of these stakeholders together to exchange knowledge, share lessons learned and address issues in native prairie restoration/reclamation and transboundary conservation efforts.

Organization Overview

The Saskatchewan Prairie Conservation Action Plan (SK PCAP) Partnership brings together 30 agencies and organizations representing producers, industry, provincial & federal governments, environmental non-government organizations, research and educational institutions working towards a common vision of prairie and species at risk conservation in Saskatchewan. The SK PCAP Partnership has proven to be an important forum for guiding conservation and management efforts within Saskatchewan's Prairie Ecozone as it:

- Increases communication and collaboration amongst partners, thereby reducing duplications;
- Addresses gaps in native prairie research/activities and programming;
- Guides the development of programs and policies that reward sustainable use and promote ecological health and integrity including species at risk recovery, and;
- Improves public understanding of native prairie and species at risk.

SK PCAP Vision & Goals

Vision: Healthy native prairie ecosystems as vital parts of our vibrant and strong communities.

Our Mission: The PCAP Partnership represents the collaborative efforts of multiple interests toward promoting and conserving Saskatchewan's native prairie. The PCAP Partners work together to deliver innovative and critical prairie conservation activities that represent the shared objectives of a diverse mix of stakeholders and that benefit the social, cultural, economic and ecological fabric of Saskatchewan.

Our Ecosystem Goal: Native prairie ecosystem health and biodiversity are conserved and restored as part of a functioning landscape.

Our Economic Goal: Sustainable uses of native prairie improve the livelihoods of Saskatchewan people.

Our Cultural Goal: Native prairie is a valued part of our culture and identity as Saskatchewan people.

What We Do - in a Nutshell?

- Native Prairie Speaker Series: monthly presentation about a topic related to native prairie and environmental stewardship in Saskatchewan. Available in-person and online.
- Prairie's Got the Goods Week: a week long webinar series about the ecological goods and services provided by native prairie
- Educational Programming for Youth: *Taking Action For Prairie* and *Adopt a Rancher* to foster awareness about the importance of native prairie for grades 6-8 and grade 10 curriculum, respectively.
- Native Prairie Appreciation Week: SK PCAP hosts events around the province to raise public awareness about native prairie risks and conservation.
- Monthly eNewsletter distributed to over 1100 subscribers with unlimited forwards
- Contributes 5 producer-focused articles in Saskatchewan Stock Grower Association's *Beef Business Magazine* per year

- Produces Guides to Managing for Optimal Habitat Attributes for Species at Risk, a resource for land managers
