Native Prairie Speaker Series

In McCord, SK

Speaker:

Beatriz Prieto, Terrestrial Ecologist, Ministry of Environment,
Government of Saskatchewan

Presentation summary:

An overview about the biology and habitat characteristics of the different life stages of Greater Sage-Grouse, and an exploration of habitat for other species that share the landscape with them. Results from a provincial inventory that aims to identify native habitat in the province using satellite imagery will be presented for the McCord and surrounding area.

About the Speaker:

Bea Prieto is an Ecologist with the Saskatchewan Ministry of Environment out of Regina. She has worked for the Saskatchewan government for over 10 years, mainly in initiatives related to native prairie and species at risk in the southwestern part of the province, including Greater Sage-Grouse, and the development of spatial tools to help assess conservation, including the Prairie Landscape Inventory initiative.
