

# WETLANDS = CLEAN WATER

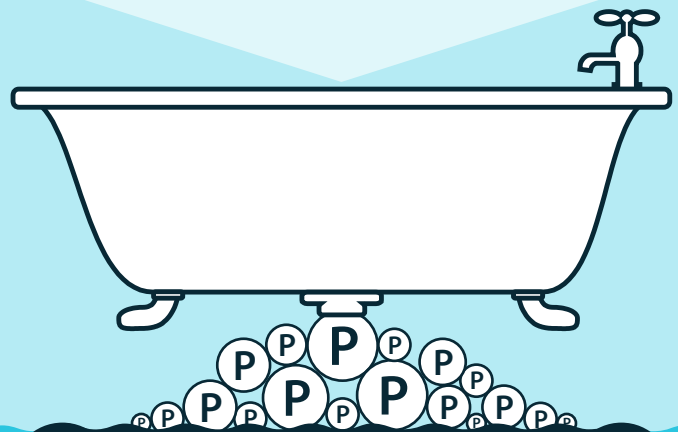

## WETLANDS

are like bathtubs that  
**trap phosphorus**, keeping it  
from **lakes and streams**

## WETLAND DRAINAGE

adds phosphorus to lakes and streams,  
where it **causes water quality  
issues such as algal blooms**

algal bloom =

## DRAINING WETLANDS = POOR WATER QUALITY

In Canada, we lose up to 80 acres of wetlands every day.  
That's like dumping over **25 wheelbarrows of fertilizer**  
into our lakes and streams *every day*.
